ROOFEXCURE WB™

(Acrylic Blended White Pigmented Water based Concrete Curing Compound)
(Confirming to ASTM – C – 309 Types 1 1D, Class - B)

DESCRIPTION OF THE PRODUCT

ROOFEXCURE WB is an Acrylic blended white pigmented water based concrete curing compound to form a penetrative membrane formation on the cementitious surfaces. This impervious film prevents excessive water evaporation which in turn permits more efficient cement hydration with reduced shrinkage, crazing, spalling and flaking on the surface. Roofexcure WB is purely 100% Acrylic blended water based concrete curing compound which eventually having good bonding adhesion with the applied surface, Roofexcure WB can not effected by natural weathering.

ROOFEXCURE TAC : Transparent Acrylic Blended water based concrete curing compound with same features like ROOFEXCURE WB recommended wherever transparent coating required.

FEATURES & BENEFITS

Single application : Forms moisture barrier for whole of the curing period
No other curing necessary : Eliminates use of water, Hessian or sand, completely.
Reliable : No risk of erratic or poor curing and ensures that cement hydrates efficiently.
Ensures hard wearing surface : Minimizes risk of drying shrinkage cracks and dusty surfaces.
Easy and safe spray application : Non-toxic and non-flammable
Drying Time : Less than one hour.

- Provides a acrylic blended, white pigmented curing membrane for new concrete.
- Compatible with many paints, adhesives, and resilient floor coverings.
- Seals concrete surfaces to protect from the effects of weathering.
- Helps eliminate dusting and hardens concrete surface by promoting proper cement hydration.
- Resistant to yellowing.

APPEARANCE

ROOFEXCURE WB - is an acrylic blended, white pigmented. After application and drying, Roofexcure WB offers a highly bonded white coloured appearance.

COVERAGE Textured Concrete : 4 - 6 Sq.mtr.
Smooth Concrete : 5 - 7 Sq.mtr.

SURFACE PREPARATION

The concrete surface must be clean and free of standing water. Remove any sealer or other material that may prevent absorption of the ROOFEXCURE WB.

AREAS OF APPLICATIONS • Interior and exterior concrete/mortar immediately after freshly laid.

RECOMMENDATIONS

- Curing compound recommended for curing of any structures like Dams, Bridges, Reservoirs, Canal Linings, Roads, Buildings etc.

CONCRETE WORKS

ROAD WORKS

DAM CONSTRUCTION WORKS

CANAL LINING WORKS

APPLICATION INSTRUCTIONS

Exposed concrete slabs : ROOFEXCURE WB should be spray applied into the newly placed concrete slab as soon as possible after it is free from visible surface water, e. g. typically 1 to 2 Hours after placing.

Shuttered and precast concrete : ROOFEXCURE WB should be spray applied to all surfaces as soon as form work has been removed or the element demoulded.

In all cases the nozzle of the spray should be held approximately 450 mm from the concrete surface and should be passed back and forth to ensure complete and even coverage. The pump pressure should be maintained at a level to produce a fine spray ensuring complete coverage of the surface.

Rate of application depends on requirements but is typically within the range of 145 to 250 ml / m².

ROOFEXCURE WB also can be applied by brush.

EQUIPMENT

The preferred and generally used equipment is a knapsack sprayer of the type commonly used in horticulture or pest control. The ideal type is knapsack sprayer with a capacity of between 5-10 litres fitted with a 2.0 milance and adjustable spray nozzles.

CLEAN-UP

Tools and equipment may be cleaned with solvent, xylene, xylol or toluene. Run cleaning solvent through spray equipment to remove residual materials and prevent clogging of nozzle in future use.

EQUIPMENT CLEANING

Immediately after use the spray equipment should be cleaned out thoroughly with fresh water. If the spray nozzle becomes blocked with acrylic particles, these can easily be removed using white spirit or similar fluid.

STOREGE & SHELF LIFE :

ROOFEXCURE WB- has a shelf life of 2 years when stored at temperatures between 5°C and 35°C. Containers should be kept airtight to prevent surface evaporation.

PACKING : 1, 5, 10, 20, 30 & 210 Ltrs Pack

ARMSTRONG products are tested, approved and extensively used in the works of CPWD., State PWDs', Irrigation, Housing Boards, Thermal / Hydel Power Projects, Steel Projects, Road Projects, Water works Projects, MES, Railways & Scores of important projects Internationally.
